# *Made in his Image*

1 Corinthians 6:9 ¶ Know ye not that the unrighteous shall not inherit the kingdom of God? Be not deceived: neither fornicators, nor idolaters, nor adulterers, nor effeminate, nor abusers of themselves with mankind, 10 Nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners, shall inherit the kingdom of God.

- Isaiah 40:26 Lift your eyes and look to the heavens: Who created all these? He who brings out the starry host one by one, and calls them each by name. Because of his great power and mighty strength, not one of them is missing.

## Uniqueness

---

Snowflakes form in a wide variety of intricate shapes, leading to the popular expression that "no two are alike". Although statistically possible, it is very unlikely for any two snowflakes to appear exactly alike due to the many changes in temperature and humidity the crystal experiences during its fall to earth.<sup>[8][9][10]</sup> Initial attempts to find identical snowflakes by photographing thousands of them with a microscope from 1885 onward by Wilson Alwyn Bentley found the wide variety of snowflakes we know about today.<sup>[11]</sup>

## Symmetry

A non-aggregated snowflake often exhibits six-fold "radial" symmetry. The initial symmetry occurs because the crystalline structure of ice is six-fold. The six "arms" of the snowflake then grow independently, and each side of each arm grows independently. Most snowflakes are not completely symmetric. The micro-environment in which

Genesis 1:26 ¶And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth.

27 So God created man in his own image, in the image of God created he him; male and female created he them.

The jig is up. Thanks to the genetics revolution we now know that there is no such thing as race. The Human Genome Project (HGP) has determined unequivocally that there is the same amount of genetic variation among individuals within a so called racial group as there is between individuals in different racial groups. What that means is that there is no real genetic difference between blacks and whites or between whites and Asians or between any of the so called races.

Alan R. Templeton, Ph.D., professor of biology in Arts and Sciences, has analyzed DNA from global human populations that reveal the patterns over the past

He shows that while there is plenty of genetic variation in humans, most of the variation is individual variation. While between-population variation exists, it is either too small, which is a quantitative variation, or it is not the right type of qualitative variation -- it does not mark historical sublineages of humanity.

Using the latest molecular biology techniques, Templeton has analyzed millions of genetic sequences found in three distinct types of human DNA and concludes that, in the scientific sense, there is no such thing as race.

But the other said, Let it be neither mine nor thine, but divide it. 27 Then the king answered and said, Give her the living child, and in no wise slay it: she is the mother thereof. 28 And all Israel heard of the judgment which the king had judged; and they feared the king: for they saw that the wisdom of God was in him, to do judgment.
