- As used in the bible, the idea is a union between God and man. God offers man partnership with Himself.
- While the covenant is a fellowship between God and man, it is a fellowship which has a legal basis.

Number of colours in spectrum or rainbow [\[edit\]](#)

A [spectrum](#) obtained using a glass prism and a point source is a continuum of wavelengths without bands. The number of colours that the human eye is able to distinguish in a spectrum is in the order of 100.^[7] Accordingly, the [Munsell colour system](#) (a 20th-century system for numerically describing colours, based on equal steps for human visual perception) distinguishes 100 hues. The apparent discreteness of main colours is an artefact of human perception and the exact number of main colours is a somewhat arbitrary choice.

Newton originally (1672) divided the spectrum into five main colours; [red](#), [yellow](#), [green](#), [blue](#) and [violet](#). Later he included [orange](#) and [indigo](#), giving seven main colours by analogy to the number of notes in a musical scale.^{[2][8]} Newton chose to arbitrarily divide the [visible spectrum](#) into seven colours out of a belief, derived from the beliefs of the [ancient Greek sophists](#), who thought there was a connection between the
